RAHIN · WEBSITES & ONLINE TOOLS

RAHIN

Find a way.
Build it together.

Want to show your products online, take orders or make everyday work easier? We help you think through the idea and build the website or tool you need, one step at a time.

HOW WE HELP

How we turn an idea into something you can use.

01	Understand your needs	We talk about your work, your customers and what you want to improve.
02	Choose a way forward	We compare options against your budget and timing, then decide what to build first.
03	Show how it will look	Before building, we show you the screens and how they will work so you can give feedback.
04	Build and try it	We build the website or tool and check key tasks, such as placing an order or sending a request.
05	Keep you informed	We follow up on tasks and decisions, keeping you informed about what is ready and what comes next.

Before starting, we agree on the work, cost, timing and any help needed after handover.

THE PEOPLE

Six perspectives. One team.

Six people with different perspectives, working together to understand what you need and carry the work forward.

01	POURIA	**You see the progress. We follow through.** Connects your priorities with the team's work and keeps decisions and progress clear, without asking you to chase every detail.
02	TIAM	**Careful questions. Fresh perspectives.** Uses careful questions and creative thinking to make problems clearer and find new ways forward.
03	AMIRMOHAMMAD	**Commitment, carried into action.** Carries decisions into action with discipline, adapting to changing conditions while following through on commitments.
04	SAYNA	**The whole picture. Care in every step.** Sees the whole picture, weighs the details and follows the chosen direction through with care.
05	HESAM	**Ideas that matter to the people using them.** Connects audience understanding with creativity and a business perspective to bring ideas closer to real needs.
06	ZAHRA	**Quality is in the details we don't overlook.** Combines research, careful questions and attention to detail to help the team avoid overlooking what matters.

THE STEPS

From conversation to handover in four steps.

01 Talk & agree
Agree on what to build, the cost and timing.

02 See the design
See how the pages will look and work.

03 Build & try
Try a working version and review what needs changing.

04 Handover & guidance
Receive the agreed work and learn how to use it.

You see what is ready along the way, and we discuss changes together.

Tell us your idea. In your own words.

Start with what you want to do and who will use it. You do not need technical knowledge or a finished plan.
